

EXCELLENCE PRACTICE COMPETITION 2022

9 November 2022: Virtual Platform

Last Date to Submit entries
31st October 2022

Data is a powerful tool that's available to organizations at a staggering scale. When harnessed correctly, it has the potential to drive decision-making, impact strategy formulation, and improve organizational performance. Data analytics is the practice of examining data to answer questions, identify trends, and extract insights. When data analytics is used in business, it's often called business analytics.

Change and Innovation are the thrust areas in all organizations. Innovation leads by provoking organizations to continuously push for improvement and always be on the lookout for new opportunities. This has led the companies to have ingrained innovation into their organization's culture, which creates an environment that supports creative thinking and generates new or improved products, services or processes. While Organizations traditionally excel in systems, procedures, rules, guidelines, there is a need to go beyond, improve divergent thinking and creative thinking.

Imagination is more important than knowledge

- Albert Einstein

We invite organizations to take part in the competition and share best practices in Data Analytics, Innovation Value Chain – Idea Generation, Idea Conversion, Idea Diffusion, and culture building including facilitating Performance Management Systems.
